

Measure All Around Us

(Say as a spoken rhyme or sing to your own tune.)

We use measure in our lives every day,
We use measure in our lives every day.
Whether heavy, light or bigger,
A mouse up to a digger,
We use measure in our lives every day.

There are some things in our lives that are big,
Like an elephant or tractors that can dig.
They can reach up to the sky,
Stretching way up high,
There are some things in our lives that are big.

There are some things in our lives that are small,
Some so small you cannot see them much at all.
Like a beetle, bug or spider,
Or germs that get inside ya!
There are some things in our lives that are small.

There are some things that are long and some are short,
Like a road that stretches long from port to port.
Some might fit into your pocket,
Like a necklace and a locket,
There are some things that are long and some are short.

When you weigh things they are heavy or they're light,
Like a boulder you can't lift with all your might.
Some you lift with just one hand,
Like a single grain of sand,
When you weigh things they are heavy or they're light.

When you pour a drink you fill it to the top,
When it's full you know it must be time to stop.
It is empty when there's no more,
Just open up the fridge door,
When you pour a drink you fill it to the top.
