

Order the sets of fractions from smallest to biggest.

$$\frac{1}{10}, \frac{1}{5}, \frac{1}{3}, \frac{1}{12}, \frac{1}{4}$$

e.g. $\frac{1}{12}, \frac{1}{10}, \frac{1}{5}, \frac{1}{4}, \frac{1}{3}$

$$\frac{1}{25}, \frac{1}{9}, \frac{1}{3}, \frac{1}{5}, \frac{1}{10}$$

$$\frac{1}{7}, \frac{1}{13}, \frac{1}{2}, \frac{1}{9}, \frac{1}{1}$$

$$\frac{1}{2}, \frac{1}{16}, \frac{1}{4}, \frac{1}{12}, \frac{1}{9}$$

$$\frac{1}{8}, \frac{1}{7}, \frac{1}{20}, \frac{1}{3}, \frac{1}{30}$$

$$\frac{1}{4}, \frac{1}{16}, \frac{1}{2}, \frac{1}{15}, \frac{1}{9}$$

$$\frac{1}{10}, \frac{1}{3}, \frac{1}{8}, \frac{1}{9}, \frac{1}{25}$$

$$\frac{1}{2}, \frac{1}{15}, \frac{1}{100}, \frac{1}{3}, \frac{1}{9}$$

$$\frac{1}{99}, \frac{1}{9}, \frac{1}{100}, \frac{1}{32}, \frac{1}{8}$$

$$\frac{1}{4}, \frac{1}{3}, \frac{1}{7}, \frac{1}{9}, \frac{1}{64}$$

Top tip: the bigger the denominator (bottom number)
the smaller the fraction.
